DESCRIPTORS Community Colleges; Day Students; Demography; Educational Objectives; Enrollment; Enrollment Trends; *Evening Students; *Junior Colleges; Junior College Students; Part Time Students; *Student Characteristics
IDENTIFIERS *Hawaii

ABSTRACT

This report examines selected characteristics of evening students in Hawaii community colleges and compares evening-only students with students taking day courses only and students taking both day and evening courses. The distribution of students by time of attendance in fall 1976 was 17% evening-only, 72% day-only, and 12% evening-day. A total of 6,045 students were registered in evening classes, constituting 29% of the total enrollment. The three groups of students were similar in that most were continuing, the majority were males, and the majority were seeking degrees. However, the evening-only students differed from the other two groups inasmuch as a greater proportion were unclassified (not seeking a degree or certificate), a greater proportion were enrolled in vocational classes, 83% were part-timers, their mean ages were six to eight years older, 60% were married, and 72% were pre-1972 high school graduates. Overall, the number of evening students showed an increase of 1% from the previous year. Extensive tabular data comparing the evening-only students to the other two groups, by selected characteristics, for each of the Hawaii community colleges and for the total system are appended. (JDS)

EVENING STUDENTS
COMMUNITY COLLEGES
FALL 1976-SPRING 1977

Data relating to the evening credit offerings of the community colleges, i.e., the number of students they attract, the characteristics of these students, the workload they carry and generate for the colleges, etc., have been of great interest to campus administrators since these classes draw upon the resources of the colleges. Previous reports on the subject have therefore aroused much interest and have been found helpful for various planning purposes.

The emphasis of this report is on the fall 1976 regular students who took evening credit courses. Data on the spring 1977 evening students are also included but will only be discussed when appropriate. For the purposes of this report, the evening classes are defined as (1) those courses starting after 5:00 p.m. or (2) those courses starting before 5:00 p.m. but 50% or more of the instructional time is completed after 5:00 p.m., e.g., 4:30 p.m.-6:00 p.m.

Students enrolled only in evening courses are compared against two other groups: (1) students taking day courses only and (2) students taking both evening and day courses. Two historical tables are included also as points of reference. Course data, i.e., number of classes, courses, registrations, etc., are included for the first time.

Sources of Data

The Student Information System's Student Personal History/Registration (SPHF/REG) file for fall 1976 (as of the end of the semester) and for spring 1977 (as of February 28, 1977) were used as the primary sources for student data. The course information was extracted from the schedule of classes reports (3030) and the course master student count reports (3091).

Highlights

1. Distribution of Enrollment, by Time of Attendance (Tables I and II)

   The distribution of students by time of attendance in fall 1976 was: evening-only, 17%; day-only, 72%; and evening-day, 12%. Registrants in evening classes, either as evening-only or as evening-day students, numbered 6,045 and comprised about 29% of the total enrollment.

   The distribution noted above is similar to that reported in earlier reports.

JC 770 294

2. Selected Characteristics of Students, by Time of Attendance (Tables III, IV and V)

The evening-only, day-only and evening-day students were similar in many ways:

a. A majority of students were males.

b. Most of the students were "continuing" (registered during the previous semester).

c. More than 90% of the students indicated Hawaii residency, Hawaii permanent home address and U.S. citizenship.

d. A majority of the students were classified (seeking a degree or certificate).

However, the evening-only students differed from the day-only and evening-day groups:

a. A greater proportion of evening-only students was unclassified, 22%, compared to 6% for the day-only and 5% for the evening-day students. However, the vocational and general and pre-professional majors were still dominant in the evening-only group.

Vocational programs attracted 33% of the evening students. Most notable were large enrollments of students with management (213), accounting (192) and police science (139) majors.

b. A substantial majority of the evening-only students were part-timers, 83%. In contrast, 64% of the day-only and 74% of evening-day students were full-time students.

c. The evening-only students were carrying a lighter academic load compared to the others: 6.3 average SSH for the evening-only, 11.6 for the day-only and 12.7 for the evening-day.

d. The evening-only students were at least 6 to 8 years older than their counterparts in the other groups as reflected in their mean ages: evening-only, 31.4 years old; day-only, 23.3 years old; and evening-day, 25.0 years old.

e. Most evening-only students were married (60%). In contrast, most students in the other groups were unmarried: day-only, 76% and evening-day, 68%.

f. Most evening-only students were pre-1972 Hawaii high school graduates (72%). In contrast, the day-only and evening-day students were 1976 Hawaii high school graduates, 80% and 66%, respectively.

3. Students in Evening Classes Only, Selected Semesters, 1972-1977 (Table VI)

The number of fall 1976 (3,580) evening students increased only 1% from fall 1975 (3,537). This modest increase may reflect the general stabilization of enrollment as reported in CC-IRP 93.

a. Proportionately more students were "continuing": 62% in spring 1977 as compared to 51% - 54% in previous semesters.

b. More students were part-timers, 86% in spring 1977 compared to 78% - 83% in earlier semesters.

c. Average semester hours carried was slightly lower this spring: 6.1 compared to 6.3 and 6.9 in earlier semesters.

d. Total SSHs generated by evening-only students decreased from 24,284 (fall 1975) to 22,143 (spring 1977).

4. Course Registration Data in Evening Classes (Table VII)

Course registration information for evening classes in fall 1976 show that there were 409 courses and 644 classes, of which about 60% were in the general education area. The 6,045 students enrolled in the evening classes generated 12,153 registrations and 34,644 student semester hours (SSH). Noteworthy is that the SSH generated for these evening classes comprised 15 percent of the total reported for fall (228,250).* SSHs generated in the evening classes ranged from 10 to 27 percent, by campus. (The SSHs generated in the evening classes in the spring 1977 semester comprised 16% of the total.)

Summary

Data over the semesters indicate little change in terms of distribution of students by time of attendance and in terms of selected student characteristics. About 29 percent of the students were registered in evening classes; about 17 percent were evening-only students. More of evening-only students were part-timers, unclassified students, married and older than the students in the other groups.

Although evening courses generated 15 percent of the total SSHs, they were utilized by 29 percent of all students (17 percent evening-only and 12 percent evening-day).

What are the implications for curriculum and facilities planning? What kinds of services would best meet the needs of these students? Is there a need for further expansion of evening credit offerings?

*This figure excludes SSH generated by special students.

*Classes 50% or more completed after 5:00 p.m.

**The SSH includes all evening classes regardless of the type of students (special: early admits and concurrents) and regardless of the groupings (evening or evening-day classes). Hence, the SSH cited in this table will be larger than those cited in Table III.
